

### **Featured Musicians –**

We are delighted to now announce for our special experimental trance event in France that we have secured three international musicians to work with the tutors and students.

**Mitra Matouf** is a Finnish/Iranian singer songwriter, musician, composer, actor, dancer and visual artist, who is fluent in five languages, speaks another four, and plays the guitar and viola. Her singing voice alone can send those present into an altered state of consciousness. She works with voice, dance and improvisation.

**Dogan Mehmet** is a British stage performer and musician of Turkish Cypriot descent, a singer who also plays the fiddle, guitar, melodeon and various Turkish instruments, who had a starring role in the West End production of the War Horse, and has a varied musical style, working as a voice coach and with experimental acoustic music.

**Tuomas Hannikainen** is a Finnish conductor and musician who currently works as a freelance musician and researcher, having worked as a conductor with orchestras in Western Europe, Australia, Asia and North America, and worked with an improvisational theatre group for the last 25 years, exploring deeper layers of music and human experience. He also supports others in finding clarity and direction through nature and wellbeing.

Their participation is going to make this an unforgettable experience!
